

Does My Child Qualify?

If your child is between the ages of 2 and 19 and has a confirmed or suspected diagnosis of

Autism,

Autistic Spectrum Disorder,

Asperger's Syndrome,

Rett's Syndrome, or

Pervasive Developmental Disorder

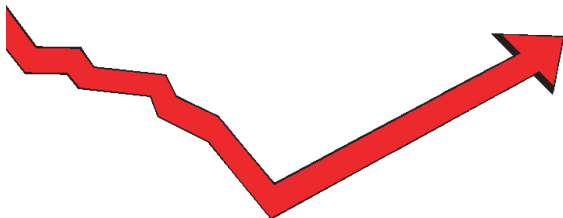

then he or she is a likely candidate for direct funding via MCFD, and for therapeutic interventions via Pivot Point.

How Is It Funded?

If your child meets MCFD requirements for autism funding (see social worker for info), then you decide how you want to allocate your Autism Funding by creating a service plan that meets your family's needs. Pivot Point is 100% compliant with the Autism Funding Unit, Workers Compensation, Employment Standards Act, and Canada Revenue Agency. Once you select your services, one monthly invoice will be sent to the AFU for payment, keeping you in control and your paperwork short and simple!

Our Mission?

To help create the turning point in people's lives that will give inspiration and focus to personal growth and success.

Other Services at Pivot Point

Pivot Point also offers a wide range of interventions and support services for families with other emotional and behaviour disorders of childhood like:

- * ADHD, ADD, ODD, & CD
- * FASD, PTSD, & Reactive Attachment
- * Depression, Anxiety, & OCD
- * Fragile "X" and Down's Syndrome
- * Sibling Rivalry & Family Conflict
- * Tourette's & PDD..... and more!

Programs

The One-Stop Autism Shop!

Integrated Case Management ~ From the start, your case will be carefully managed by our experienced Program Assistants to create a clear and comprehensive support plan that addresses all of your family's needs. Then they will assign the appropriate supports to form a family care team, and work to ensure all interventions are coordinated with each other and focused on the same goals.

Behaviour Consultation ~ Leading the family's "Behaviour Support Team" our consultants thoroughly assess children's needs, design comprehensive behaviour intervention plans and curriculum, and train & supervise their teams of Behaviour Interveners and Child Care Workers.

Speech and Language Therapy ~ Certified Speech Pathologists are available to work 1-on-1 with children with language impairments, and to conduct assessments that give direction to the work of all CCW's and interveners.

Occupational Therapy ~ For children with sensory integration deficits, coordination disorders, or growth delays that impact their ability to be successful in life, direct O.T. support may be invaluable. Our certified therapists assess deficits and work 1-on-1.

Counselling for ALL in the Family ~ Clinical Counsellors can be added to your family's care team to help address emotional, relational, and adjustment issues with the children, adults, or in the marriage in general. Everyone who needs support, gets support!

A.B.A. Behaviour Intervention ~

For children under age 6, an intensive behaviour intervention team is assembled where 2, 3, or 4 Behaviour Interveners work directly with each child for up to 20 hours per week under the close supervision of the Behaviour Consultant and the clinical team. Built on "Best Practices", this work is highly focused to produce optimum growth and development in each child!

Clinic Based Program ~ Small groups of young children come together for 1, 2, or 3 sessions per week of Natural Environment Training. These groups provide excellent extension and generalization of home based programs.

Child Care Work ~ Experienced CCWs work on social skills, life skills, communication, and behaviour twice per week with school aged children. Based on the skills and principles of A.B.A., these programs are goal oriented to produce measureable results.

Teen Transition Supports ~ Visit our website at TeenTransitionPlanning.ca for more information about our supports for helping children age 14-19 prepare for successful adult living. Supports include assessment, 1-1, family, and group based learning.

Academic Tutoring ~ Experienced Teachers come to your home to provide assessments and lesson plans. Then our Tutors provide 1-on-1 support through 2 or 3 weekly sessions in home or clinic to help increase academic skill and success.

Brainwave BioFeedBack ~ Neurotherapy can significantly reduce or remove barriers to learning (such as problems with attention, focus, sleep, concentration, anxiety, anger, hyperactivity, and depression). This helps to optimize each child's ability to learn from intensive ABA programming.

Social Skills Groups ~ Our "Therapeutic Social Skills Groups" brochure describes our clinically focused 8-week groups for children in 3 different age groups. Call to add your name to the list!

Parenting Groups ~ Parents gather for 2 hours (usually 6:30 to 8:30 PM), for 8 consecutive weeks to explore curriculum on effective parenting, to share successes, and to learn new approaches to create a happy, healthy, and balanced family.

Sibling Support Groups ~ Visit our website at siblingSUPPORTgroups.ca for up-to-date information about our interactive 8-week groups that help "the other kids" to better understand and adjust to living with a brother or sister with autism.

Call Anytime ~ Our 'no waitlist' policy means that most families can have a meeting within a week, and will see their care team assembled through the coming month! (Subject to service provider availability in your region). This makes *Pivot Point* a fast and easy way for parents to get the best services for their family.
